Art Unit: 2193

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-13 are, drawn to an equalizer, classified in class 708, subclass 5.
 - II. Claims 14-42 are, drawn to a power spectrum estimator, classified in class 708, subclass 300.

2. The inventions are distinct, each from the other because:

Each group of claims is directed to a separate invention. It is noted that the groups maybe belong to a system. However, this is not sufficient to prevent a restriction requirement.

Inventions I and II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because subcombination is not essential to combination. The subcombination has separate utility such as a power spectrum estimator.

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Art Unit: 2193

4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
